

Hosting & Co-location Services

Flexible Solutions

Continent 8 Technologies Hosting services can provide solutions from world class co-location across multiple facilities up to fully managed hosting solutions where we take on the burden of managing your IT infrastructure. This flexibility allows you to select the services you need, enabling your teams to concentrate on your business priorities and core business goals.

Starting at hardware sourcing right through to managed network and IT services, Continent 8 can expertly support your hosting project efficiently, confidentially, and securely

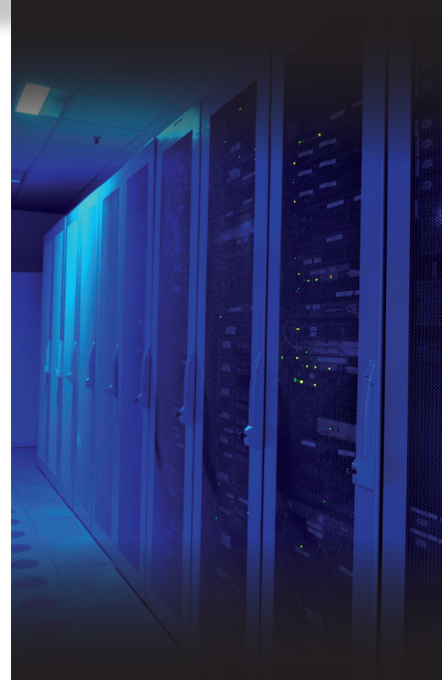

Local Expertise with a Global presence

Uniquely able to provide local expertise in provision of hosting services in both highly regulated and technically challenging geographic locations around the world, Continent 8 Technologies has developed reliable and secure solutions for organisations where Hosting provision is required as part of a business critical application platform.

With a wealth of experience in providing clients with world class services, Continent 8 Technologies can supply your organisation the business critical services necessary at the location you need them. Whether your organisation needs to maintain ownership of hardware, or require fully managed solutions up to the application layer, including hardware deployment, firewall, network and IT service management.

Benefits

- Reduced Capital and operational expenditure; reduce or remove your on-premise hosting costs
- Improved technology provision; benefit from investment in infrastructure and technology upgrades from Continent 8
- Reduce your organisations carbon footprint; a shared data center offers efficiencies of scale
- Take responsibility for the solution tier you want to manage; leave the rest to us - from environment provision up to fully managed service provision
- Implement and provision resilient, high availability systems; without high capital investment costs
- Increase your global reach and scale quickly, with resilient power, connectivity, cooling and 24 x 7 Physical security at all Continent 8 sites across the World
